RX Series

Multi Media Filters

The RX Series Multi Media Filter produces crystal clear water quickly and efficiently with excellent flow rates and superior back wash performance.

POWERFUL POOL FILTRATION

A complete range of seamless rotationally moulded HDPE filters designed to withstand demanding applications of today's swimming pools and high performance pumps. Large capacity and higher flow rates enable the pool water to be filtered more effectively in a shorter period of time, saving expense on pump operating costs.

EASY TO CLEAN

Hurlcon RX filters produce crystal clear water, using fine sand or zeolite as the filter media which lasts for years. Periodic cleaning is accomplished in less than three minutes with the simple manipulation of the six position multi-port valve.

SPHERICAL SHAPE FOR STRENGTH

The spherical design of the RX Series with separate base enhances the structural strength of the filter providing added durability. Suitable for high pressure filtration systems.

FURTHER FEATURES:

- 12 arm hub with 25mm laterals allows excellent flow rates and superior back wash performance ensuring the filter sand is cleaned efficiently and effectively.
- The clamp on 6 position multi-port valve ensures positive fitting and alignment of pipe work, minimising installation time with no special tools required.
- Self sealing barrel unions allow quick disconnection and removal of the valve for easy access to inspect or change the media.
- Available in six sizes and are complete with multi-port valve, pressure gauge, barrel unions and backwash sight glass.
- Suitable for in floor cleaning systems.
- Limited ten year extended warranty.

COMPLEMENTARY PRODUCTS

TX Pump

MX Heater

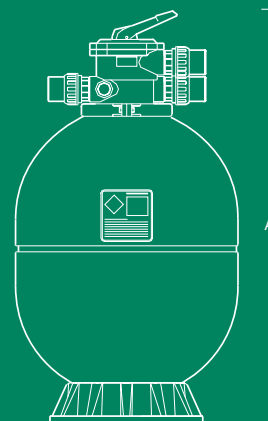

Genus IV Remote Control

VX Salt Chlorinator
