

JET VAC CLEANER

AQUAQUIP

Jet Vac keeps your pool looking pristine

There's virtually nothing this cleaner can't swallow! The huge 115mm throat picks up twigs, large leaves, dirt, even golf balls and goggles! Large capacity bag compacts up to 3.5 litres of rubbish.

Jet Vac features automatic forward/reverse cycles to ensure complete pool coverage on any surface without getting stuck in corners. Propulsion and cleaning is achieved purely by jets of water. Wheels are free spinning and are not connected to turbines, drive belts or gears. Jet Vac requires a dedicated plumbing line and is powered by the AquaQuip booster pump.

Install Jet Vac, the fully automatic pool cleaner most suited to Australian conditions that sets industry standards for speed, quality and efficiency.
